What is Near-Infrared Therapy?

POINT 1 Light That Reaches Muscles and Joints

Near-infrared light penetrates up to 12 times deeper than far-infrared, reaching muscles and joints to boost cellular energy and aid recovery. This deep penetration is especially vital for the patella, a small bone located deep within the knee joint.

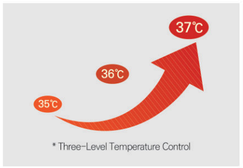

POINT 2 Pain Relief and Inflammation Reduction

Near-infrared light helps increase blood circulation, supporting the delivery of nutrients and oxygen. It aids in reducing inflammatory responses and alleviating pain, making it beneficial for relieving joint issues and stiffness in senior dogs.

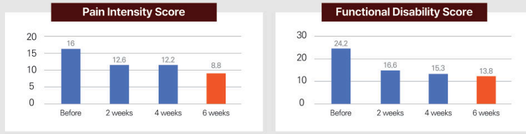

POINT 3 Deep, Soothing Warmth

Near-infrared light naturally generates heat, warming the body from within simply by exposure. Compared to cold therapy, this effective heat care helps relax joints and muscles, relieve pain, and support recovery.

All Products Clinically Tested

Overview	This study assessed the efficacy and safety of long-term use of the CiriusPet Near-Infrared Veterinary Medical Device for managing chronic pain in 12 dogs with Patellar Luxation, Arthritis, and Intervertebral Disc Disease.
Method	Owners applied the device to the area once daily. Over 42 days, the dogs visited the clinic every 2 weeks (4 visits in total) to record pain scores and monitor for adverse reactions.

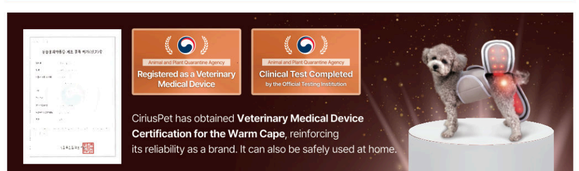

Results

Safety	No adverse reactions were observed in the 12 dogs during the study
Pain	Pain score decreased from 16 to 8.8 after 6 weeks
Function	Functional Impairment score decreased from 24.2 to 13.8 in 6 weeks
Quality of Life	Quality of Life score improved from 2.3(Fair) to 2.9(Good) after 6 weeks

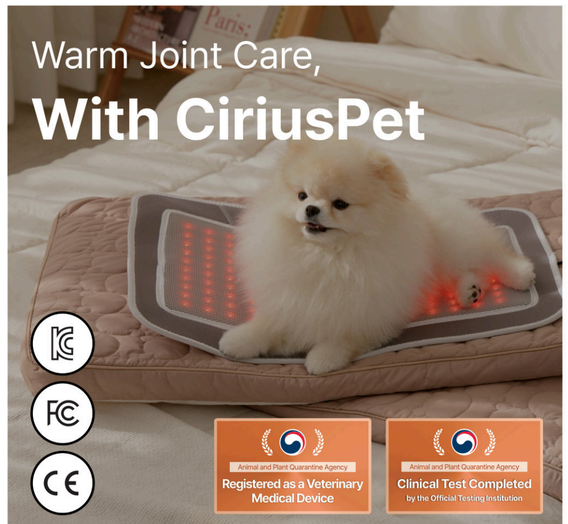

Conclusion Ciriuspet's Near-Infrared medical device is expected to have a positive impact on pain relief and functionality in pets with chronic pain, and is safe when used properly

Because Your Pet Deserves the Best

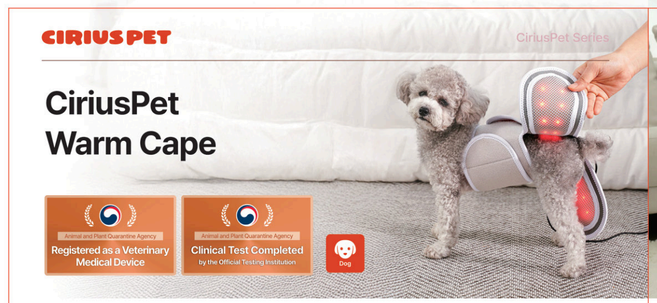

CIRIUSPET PET HEALTHCARE

All Products Clinically Tested CiriusPet Series

Our lives are warmer and more fulfilling with our pets.
At CiriusPet, we're dedicated to finding and creating better ways to keep that warmth alive.

CiriusPet Warm Cape

Description

#Small Breeds #Patella #Hip #Disc

- Y-shaped design for all-in-one care of patella, hip, and spine
- Wireless controller allows easy use anywhere
- Registered veterinary medical device with the Animal and Plant Quarantine Agency (KOR)

Details

CiriusPet Warm Cape

Product Name	CiriusPet Warm Cape
Weight	110g
LED Chips	40 Dual Chips (Total 80)
Size	535mm x 220mm
Temperature	35°C, 36°C, 37°C

CiriusPet Warm Cape PRO

Description

#Small Breeds #Medium-Sized Breeds #Hip #Patella Focused

- Extended Warm Cape for added length
- Suitable for small to medium-sized dogs around 10kg
- Recommended for dogs with a chubby belly or long legs
- Ideal for focused care of joints and patella
- Wireless controller allows easy use anywhere

Details

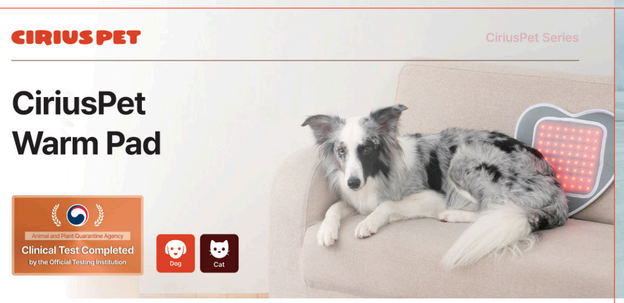

CiriusPet Warm Cape PRO

Product Name	CiriusPet Warm Cape PRO
Weight	152g
LED Chips	64 Dual Chips (Total 128)
Size	750mm x 220mm
Temperature	35°C, 36°C, 37°C

CiriusPet Warm Pad

Description

#Medium-Sized, Large Breeds #Cats #Patella #Disc #Versatile

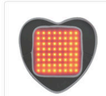

- Pad-type product for use on various areas, including back, spine and neck
- Detachable straps allow secure attachment to the body
- Also suitable for cats that enjoy lying in warm spots
- Can be used like a blanket, minimizing stress from wearing
- Wireless controller allows easy use anywhere

Details

CiriusPet Warm Pad

Product Name	CiriusPet Warm Pad
Weight	97g
LED Chips	64 Dual Chips (Total 128)
Size	300mm x 285mm
Temperature	35°C, 36°C, 37°C

CiriusPet Warm Pad PRO

Description

#Large Breeds #Cats #Full Body Care #Versatile

- A large pad-style product spacious enough for large breeds
- Includes two detachable straps for secure placement on the body
- Can be laid flat on the floor, perfect for cats who enjoy warm resting spots
- Generously sized, making it ideal for multi-pet households
- With wireless controller, can be used anywhere and easy to carry

Details

CiriusPet Warm Pad PRO

Product Name	CiriusPet Warm Pad PRO
Weight	262g
